Introducing a New Vanguard Target-Date Offering

On April 2, 2019, the Vanguard Institutional Target Retirement fund* series was added to replace the custom LifeCycle funds in the Island $avings Plan. If you had a balance in a Lifecycle fund or fund(s), your existing balance was automatically transferred to one of the new Vanguard Funds, and no action was required.

The Vanguard Target Retirement Funds offer the simplicity of a complete portfolio in a single investment. Each target-date investment is made up of several broadly diversified Vanguard funds. The investment strategy is built using four (4) or five (5) of Vanguard’s broad-based index funds that cover all major worldwide asset classes. As the year in the investment’s name draws near, its investment mix becomes more conservative by lessening equity exposure and increasing exposure to fixed income investments. That way, a single target-date investment is meant to serve you throughout both your career and retirement. More information is available the Vanguard Funds Fact Sheets on the Investment Tab on the Plan website at: prudential.com/islandsavings.

Fund Updates

On the watch list: Wellington Research Value Fund
Stable Value Fund: Effective April 1, 2019, the Second Quarter 2019 rate is 3.00%.
Introducing a New Vanguard Target-Date Offering
continued from page 1

How the Vanguard Funds work:
• There are twelve (12) new funds offered in five-year increments at a low cost of 9 basis points (0.09%).
• The year in the investment name is its target date, the approximate year in which an investor expects to retire and leave the workforce. A target-date investment will hold a higher proportion of stocks the further it is from its target date.
• To help manage risk as the target date approaches, the investment manager will gradually decrease its stock holdings and increase its bond holdings. Bonds usually have a lower risk of loss, though they also have lower potential gains than stocks.
• When the investment reaches its target date, you don’t need to take your money out. The gradual move from stocks to bonds simply continues automatically. Target-date investments are designed to keep your money invested appropriately throughout your retirement years.

The Vanguard Funds are a diversified solution that offers:
• The opportunity for Plan participants to invest in a wider range of diverse investment funds that are not currently offered in the Plan.
• Less risk through broad diversification, including exposure to major market sectors (e.g., healthcare, technology, etc.) and segments (e.g., the kinds of specific characteristics that a company has).
• Professionally managed asset mix.
• Automatic rebalancing so the fund becomes more conservative the closer you get to retirement.
• Low costs.

Your new digital experience will help you assess where you may need to make a change to your financial plan, address day-to-day money matters, budget more effectively and more!

Once you enter the upgraded website, the State of Hawaii Board of Trustees and the State Deferred Compensation Plan are not responsible for and do not have oversight over the content or materials on the Prudential website.
Investors should consider the fund’s investment objectives, risks, charges and expenses before investing. The prospectus, and if available the summary prospectus, contain complete information about the investment options available through your Plan. Please call 888-712-5642 for a free prospectus, and if available a summary prospectus, that contain this and other information about our mutual funds. You should read the prospectus and the summary prospectus, if available, carefully before investing. You can lose money by investing in securities.

Shares of the registered mutual funds are offered through Prudential Investment Management Services LLC (PIMS), Newark, NJ, a Prudential Financial company. Prudential Retirement is a Prudential Financial business.

The target-date is the approximate date when investors plan to retire and may begin withdrawing their money. The asset allocation of the target-date funds will become more conservative as the target-date approaches by lessening your equity exposure and increasing your exposure in fixed income investments. The principal value of an investment in a target-date fund is not guaranteed at any time, including the target-date. There is no guarantee that the fund will provide adequate retirement income.

A target-date fund should not be selected solely based on age or retirement date. Before investing, participants should carefully consider the fund’s investment objectives, risks, charges and expenses, as well as their age, anticipated retirement date, risk tolerance, other investments owned, and planned withdrawals.

The stated asset allocation may be subject to change. It is possible to lose money in a target-date fund, including losses near and following retirement. Investments in the funds are not deposits or obligations of any bank and are not insured or guaranteed by any governmental agency or instrumentality.
